Bio Series

The Bio Series of refrigerators provide two lines for storage of biological material, with high capacity or extended hold time variants

Extended Hold-Time Models

With narrower neck openings for outstanding thermal efficiency, the extended hold time models offer long term storage possibilities with minimal LN2 consumption

Bio Series Extended hold Time

All Extended hold time units have a narrower neck opening for outstanding thermal efficiency

High Capacity Models.

These units allow the storage of large quantities of biological material while still offering excellent holding times

All high capacity units have wider neck openings for easy access.

Bio Series High Capacity

Product Features

- 11 models, from 2 litres to 36 litres capacity
- Strong lightweight aluminium construction
- High thermal efficiency ultra-low evaporative losses
- Numbered index location points for canisters
- Heavy-duty lockable enclosures offer excellent security
- Straw storage
- 1.2, 2.0 or 5.0ml cryovials held on canes
- Roller bases and level alarms
- 5 YEAR VACUUM WARRANTY

Bio Series

All Bio Series containers are designed and manufactured in our purpose-built ISO 9001 accredited facility using the very latest CAD technology. Advanced super-insulation and ultra-high vacuum techniques allow incredibly long holding times

Canes and sleeves are available as well as a range of goblets and lifters for straw storage

Goblets

Optional

Lifters

Optional

Roller bases and long/short canister options available

The Alarm and Datalogger.

The Battery CryoGuard offers an LN2 level alarm facility in areas where mains electricity is unavailable

Canister-equipped Refrigerators

Included with every Bio Series container are internal storage canisters suitable for the storage of biological material in cryovials on canes or straws in goblets

Internal storage canisters

Canister-Equipped Refrigerators
